
BAT text on taskbar icon

Posted by Pieter - 2008/09/09 21:54

Hi,

I always see the BAT text flashing on the little taskbar icon.

Can this be turned off ? I guess it means that I'm on battery, but there are other means to see that..

Maybe you can remove it if the checkbox 'don't start xplanet when on battery' is unchecked..

Greet

Pieter

Hello Pieter,

there is a possibility to change the battery detection.

You manually add a String to your winXplanetBG.ini file:

Battery detection=0

Add these two lines at the end of the winXplanetBG.ini file and then there should no flashing BAT in the globe anymore.

I hope this helps.

Greetings from Bremen in Germany

Markus

Worked like a charm !

Thx !

Pieter
