
clouds maps in real time

Posted by nonostar - 2008/09/10 02:20

Do you know where i can found clouds images who refresh in real time ?

i use this : <http://xplanet.sourceforge.net/clouds.php> for france

Do you know another ?

Regards

Hello Nonostar,

there are no cloud images that are refreshed more often, as I know. The clouds are created by a script from Hary Nair. The source of the parts are hosted at the University of Dundee. I have no idea, how often these images are updated.

Greeings
Markus
